STORY BOOK LAND

## Part I - Alice in Wonderland

Alice was beginning to get very tired of sitting by her sister on the bank and of having nothing to do; once or twice she had peeped into the book her sister was reading, but it had no pictures or conversation in it, "and what is the use of a book," thought Alice, "without pictures or conversations?"

. . . . . Alice In Wonderland.

# Cobourg Figure

We Welcome You to Our Sixth Annual

Last year we outlined for you some of the history of our Club, and various obstacles that it has had to overcome. Since the fall of 1953 when the first Arena burnt down, our membership has not been as large as we would like it. We feel that this would be remedied if more parents and children were aware of the activities of a figure skating club. Another season we will welcome your enquiries, and attendance at sessions so you can see for yourself how thoroughly enjoyable figure skating can be.

We would like to give you a word picture of what we have in store for you as a skating member. Figure skating is really broken down into three forms; School Figures, Dancing and Free Skating. School Figures consist of tracings on a figure eight, either forwards or backwards, and on either foot. As proficiency increases other variations are added, and tests are conducted twice yearly. The dances are performed in a set pattern on the ice, and to music that has been chosen for the tempo of each dance. One starts by learning the simplest Dutch Waltz and progresses through to the more difficult Tangos and Fox Trots. Here again tests are held twice yearly. Free Skating is what you will see our soloists do. It consists of learning to jump and spin, together with other footwork not associated with school figures.

Due to this diversity in skating the club's weekly hours are broken down to accommodate

se styles. Another innovation this  
a Friday one hour games session.  
s period team spirit and co-operat-  
eveloped, as well as endurance and  
f a more rugged nature than is en-  
in school figures and dancing.

is very pleased with the results of  
of its skaters this season, which  
ry well for the instructing ability of  
ub Professional, Mr. John Rodway.  
asting the results of tests passed by  
ers since our last Carnival. These  
ll also include those completed dur-  
er School last year. The results of  
Competitions are also listed and can  
page 22.

Club accomplishment this year has  
starting of a Senior Skating Session.  
ion is conducted for one hour of an  
ch week. The active membership is  
usiastic, and we have had numerous  
ers out for some of the sessions who  
re will become full time members  
ar.

scenery we have this year has been  
by some of the Art Students of the  
District Collegiate Institute, under  
of Miss Pat. Carr. While we are  
display their handiwork, we are  
debted to them for their fine con-  
the Carnival.

men's Auxiliary are to be compli-

mented for the very active year they have had,  
and for the generous assistance they have given  
the executive.

—THE BRITISH AMERICAN OIL COMPANY LIMITED

**TCP** gives  
 up to **15%**  
 more power  
 within **400** miles

lets so fast you'll think your  
 engine's had a tune-up before  
 you've finished your second  
 tankful—within 400 miles

can be almost certain that you are not getting  
 all power your car's engine was designed to deliver.  
 It's because lead and carbon deposits build up  
 in the combustion chambers and on spark plugs.  
 The power you should be getting is held captive in  
 the engine.

It happens to all cars. In combustion chambers  
 carbon deposits get red hot and pre-fire the fuel before  
 the piston reaches its proper firing position. Power  
 is wasted as a result of pre-ignition.

Power is also wasted when these deposits short-  
 circuit spark plugs and cause misfiring. Pre-ignition  
 and misfiring together are the major cause of power  
 loss in your car.

Pre-ignition "fire-proofs" deposits in combustion chambers  
 by pre-ignition. On spark plugs it makes the  
 plug non-conductive and prevents spark plug  
 circuiting.

Up to 15% more engine power is released by  
 Premium Gasoline with TCP. You'll notice  
 the difference before you have finished your second  
 tankful—within 400 miles. See your Shell Dealer for  
 Premium Gasoline with TCP soon.
