STORY BOOK LUND

Part I - Alice in Wonderland

Alice was beginning to get very tired of sitting by her sister on the bank and of hearing nothing to do once or twice she had peeped into the book her sister was reading, but it had no pictures or conversation in it, "and what is the use of a book," thought Alice, "without pictures or conversations?"

GENERAL ELECTRIC APPLIANCES

history of our Club, and various associates that it has had to overcome. Since the fall of 1933 when the first Arena burnt down, our membership has not been as large as we would like it. We feel that this would be remedied if more parents and children were aware of the activities of a figure skating club. Another season we will welcome your enquiries, and attendance at sessions so you can see for yourself how thoroughly enjoyable figure skating can be.

We would like to give you a word picture of what we have in store for you as a skating member. Figure skating is really broken down into three forms: School Figures, Dancing and Free Skating. School Figures consist of tracings on a figure eight, either forwards or backwards, and on either foot. As proficiency increases other variations are added, and tests are conducted twice yearly. The dances are performed in a set pattern on the ice, and to music that has been chosen for the tempo of each dance. One starts by learning the simplest Dutch Waltz and progresses through to the more difficult Tango and Fox Trots. Here again tests are held twice yearly. Free Skating is what you will see our skaters do. It consists of learning to jump and spins, together with other footwork not associated with school figures.

Due to this diversity in skating the club's weekly hours are broken down to accommodate

COMPLIMENTS OF

Smith Transport

LTD.

a period team spirit and co-operation developed, as well as endurance and a more rugged nature than is seen in school figures and dancing.

He is very pleased with the results of all his skaters this season, which is well for the instructing ability of an Professional, Mr. John Rodway, seeing the results of tests passed by him since our last Carnival. These will also include those completed during school last year. The results of Competitions are also listed and can be seen on page 22.

Club accomplishment this year has starting of a Junior Skating Session, which is conducted for one hour of each week. The active membership is increasing, and we have had numerous new skaters out for some of the sessions who are will become full time members next year.

Seasonary we have this year has been by some of the Art Students of the District Collegiate Institute, under the direction of Miss Pat. Carr. While we are displaying their handiwork, we are indebted to them for their fine contribution to the Carnival.

Men's Auxiliary are to be congratulated.

The executive.

up to 15%
more power
within **400 miles**

*gets so fast you'll think your
engine's had a tune-up before
you've finished your second
tankful — within 400 miles*

As we don't want you to get
tired, your car's engine was designed to deliver
it's best performance and earliest deposits build up
on the combustion chamber and on spark plugs.
You should be getting a full engine tune-up.

It happens to all cars. In combustion chambers
deposits get collected and produce the fuel before
it reaches its proper firing position. Power
falls as a result of pre-ignition.

It is also caused when these deposits short-
circuit spark plugs and cause misfiring. Pre-ignition
taking together are the major cause of power
loss.

It's the "dirty" deposits in combustion chambers
and pre-ignition. On spark plugs it makes the
insulation non-conductive and prevents spark plug
functioning.

So SHELL more engine power is released by
Premium Gasoline with TCP. You'll notice
power before you have finished your second
tankful — within 400 miles. See your Shell Dealer for
Premium Gasoline with TCP now.
