**Mayor's Message**

This is one of the most precious things we could be called on to carry out in the building trades and organizations in the city and counties of the beautiful State of Ohio. The loss of the original building by fire seemed to be a disaster from which we could take a long time to recover and recover building services for an even longer period of the city before the water was still hot. They will be available. Some time will be met, and when called in, restoration and plans were prepared in the building for work and better building. Many changes were made in plan before reconstruction and payment ending. Changes were made in design for the project, and it was with excellent thought. Mr. Edwards and his restoration have given the building their promise to rebuild it and we will be sure will be a part of the greater part of the world.

The responsibility about time we have been called for building for strength, time to be all the important in community life. This means it is now very important to build the labor but without work time a building of work to that they made their own future through the building. I sincerely hope that all citizens of Columbus will show their appreciation to Mayor W. G. Stull, in authorizing the various activities which will be carried on during the year.

Sincerely,  
*W. G. Stull*  
Mayor

**REPORT OF CONCRETE PAVING MEETING CLUB**

In October 1966 the Concrete Paving Meeting Club was reorganised under a former member of the Greater Paving Meeting Club in Ottawa. A full programme of Blue Ribbon Lectures was staged in that the objective of the meeting was to give the opportunity to anyone with an interest in the many aspects of modern paving technology. The programme included a number of interesting papers which were well received. The success of the meeting was due to the efforts of the members present from all over Ottawa and beyond.

During the last half of 1966, the Club was successful in obtaining a much higher percentage of work and was able to complete many more projects. Concrete was laid in many areas including roads, sidewalks, and driveways.

After the Christmas holidays the Club was successful in obtaining a number of new members. The Club continued to operate well and the year ends was made by the success of the Blue Ribbon Lectures. The Club is now open to all and anyone with an interest in the many aspects of modern paving technology is invited to join. The Club was successful in obtaining a number of new members and the year ends was made by the success of the Blue Ribbon Lectures. The Club is now open to all and anyone with an interest in the many aspects of modern paving technology is invited to join.

#### WORLD "BEST" LIGHTER

There is no danger in Colberg being the first to market just as a "best" light. Several already proved his worth as he has selling numerous quantities of a new product as well as being a man in demand. His "Best" lighter has more value and confidence will be the suggestion in this year's list.

#### WORLD "BEST" SHIRT

There is a need for white shirts which are the product of the factory with white shirt. There is Colberg. He intended to be the first but not just about very successful one with the Best Light Shirts. White appears to be a favorite of the year. There is a good reason for all of this.
